EA1024R1(13) / HISTORY

SUBJECT: SCOPE OF DOCUMENT

CONTAINS :

1-0 General Description

2-0. Input Requirements

3-0. Output Requirements

4-0. Reliability

5-0. Environment

6-0. Safety

7-0. Mechanical Characteristics

1-0. General Description

The purpose of the document is to specify a **Single phase AC input, single output** switching power supply. This specification is suitable for: **EA1024R1 Series**

This product is AC to DC switching power transfer device, it can provide for a **24V/1.5A max & 36W max** DC output with constant voltage source.

This Specification defines the input, output, performance characteristics, environment, noise and safety requirement for a power supply.

2-0. Input Electrical Specification

2-1. AC Input Voltage

Maximum Voltage: 264Vac

Normal Voltage : 100~240Vac

Minimum Voltage: 90Vac

2-2. AC Input Frequency

Maximum Frequency: 63Hz

Normal Frequency: 50~60Hz

Minimum Frequency: 47Hz

2-3. Input Current

a. **1.0A** (Max.) @ 115Vac input with full load.

b. **0.5A**(Max.) @ 230Vac input with full load.

2-4. Energy saving standards :

Designed to meet the following standard

DoE Level VI

2-4-1 Efficiency:

87.40% minimum at 115Vac/60Hz & 230Vac/50Hz input voltage and 25%, 50%, 75% & 100% of max output current. Meet DoE Level VI

2-4-2 No Load Power Consumption:

No Load Watt < 0.1W at 115Vac/60Hz & 230Vac/50Hz input voltage.

2-5. Configuration

3-wire AC input (**Line, Neutral, FG**)

2-6. Input Fuse

The hot line side of the input shall have a fuse, rating (**T2A/250V**)

2-7. Inrush Current

30A at 115 Vac

60A at 230 Vac At cold start, maximum load.

2-8. Line Regulation

This line regulation is less than **± 1%**, of rated output voltage @ full load.

2-9. Hold Up Time

8.3mSec., @ Normal line, with full load.

2-10. Rise Time

50mSec., @ Rated AC input, with full load.

From 10% to 90% of output voltage.

2-11. Turn-ON Time

The output voltage should rise to 90% of rated output voltage in less than **3 SEC.** from AC apply 220Vac to start up.

3-0. Output Requirements

3-1. Output Voltage and Current

Output Voltage (Vdc)	Current Min.(A)	Current Max.(A)
+24V	0	1.5A

3-2. Load Regulation

Voltage (Vdc)	Tolerance (%)	Regulation (Vdc)
+24V	+5/, -5	22.8V~25.2V

3-3. Dynamic Load Regulation

±5% excursion for **50% - 100%** or **100% - 50%** load change of DC output at any frequency up to 1KHz(duty 50%)

3-4. Ripple & Noise

The power supply shall not exceed the following limits on the indicated voltage for 60Hz or 50Hz ripple, Switching frequency ripple and noise and dynamic load variations measured with a 20MHz bandwidth

Output	Ripple/Noise
+24V	1.0% max. of rated output voltage

Ripple / Noise: 60Hz ripple + switching ripple and noise

Ripple & Noise are measured at the end of output cable which are added a 0.1uF ceramic capacitor and a 47uF electrolytic capacitor

3-5. Over Voltage Protection

40V Max. of rated voltage

(Output clamped with zener diode, do not test with external DC source.)

3-6. Short-Circuit Protection

The adapter can withstand continuous short at DC output and no damage.

It will enter into normal condition if the fault condition is removed.

3-7. Stability

2% Max. at constant load with constant input (after **30 minutes** of operation).

3-8. Temperature Rise

Less than 45 °C on top/bottom case at normal AC input & 80% load of DC output at environment temperature 25 °C.

3-9. Drop-out (Power Line Disturbance)

Output voltage shall remain within the specified regulation range, through the absence of a line input during 1/2 cycle, at full load at 115Vac/50Hz & 230Vac/50Hz input voltage.

3-10. Voltage Isolation

The DC ground will be isolated from the AC neutral and AC line.

4-0.Reliability

4-1. MTBF (MIL-HDBK-217F)

The power supply shall be designed and produced to have a mean time between failures (MTBF) of 100,000 hours at 25 degrees C

5-0. Environment

5-1 Temperature

- a. Operating : 0 to 40
- b. Storage : -20 to 85

5-2 Humidity

- a. Operating : 10 to 90 %
- b. Storage: 5 to 90 %

5-3 Altitude

From sea level to 5,000Meter (operation) and 5,000Meter (non operation)

6-0. Safety

6-1. Hi-Pot Test

1800Vac 5mA 2Sec. between primary and secondary circuit

6-2. Insulation Test

500Vdc, 2Sec. between primary and secondary circuit

IR should **100 MΩ**.

6-3. Leakage Current

750uA,at 240 Vac/50 Hz

6-4. Safety

UL, CUL, TUV, CB, UKCA, CE, FCC, CCC, BSMI, RCM

6-5. EMS

Items	Specification	Reference
ESD	Contact: ± 4KV	IEC 61000-4-2
	Air: ± 8KV	
RS	Frequency:80~1000MHz Field Strength: 3V/M , 80% AM(1KHz)	IEC 61000-4-3
EFT	1.0 KV on input AC power ports.	IEC 61000-4-4
SURGE	Line to Line: ± 1KV (peak) Line to FG: ± 2KV (peak)	IEC 61000-4-5

6-6. EMI

Comply with Standards
EN 55032 Class B
FCC PART 15 Class B

7-0. Mechanical Characteristics

7-1. Physical Size : 98 mm (L) * 46 mm (W) * 31 mm (H)

7-2. Enclosure material : 94V-0 minimum

7-3. Output Cable (Reference) : UL 1185 #18 (AC ground is connected to DC return.)

7-4. Vibration Test

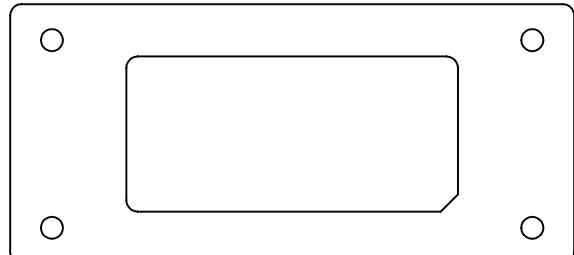

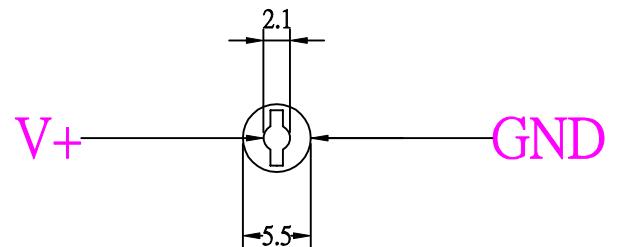

The vibration frequencies are set at 20Hz, with total amplitude of 1.5mm

Along the 3 directions namely X-Y-Z. The each direction should be vibrated for 60 minutes, after testing no abnormal electrical or mechanical should occur.

7-5. Drop Test (Referencing to CSA C22.2 No.950/UL1950/UL1310/EN62368)

Products shall be dropped from a height of 1000 mm onto a horizontal surface consists of hardwood at 13mm thick , mounted on two layers of plywood each 19mm to 20mm thick , all supported on a concrete or equivalent non-resilient floor. Upon conclusion of test , the equipment cannot into hazardous moving parts and hazardous voltage circuits need be operational , and need meet Hi-Pot specification requirement .

7-6. Net Weight (Reference) : 200g

Operating instructions

Safety Instructions:

- Keep the power supply unit, its individual parts and the packaging material away from children.
- Only use the power supply unit indoors. Never operate it in damp rooms or in the rain.
- Never use the power supply unit in areas where there is a risk of explosion.
- Keep the power supply unit away from open flames and hot surfaces.
- Do not expose the power supply unit to extreme temperatures, direct sunlight, strong vibrations, mechanical pressure, moisture, flammable vapours or solvents.
- If the power supply unit moves from a cold to a warm environment, condensation may form which can damage the electronic. Do not connect the power supply unit until it has reached room temperature.
- Do not operate the power supply unit if it shows visible damage, has been stored for a long time under unfavourable conditions or is defective.
- Do not immerse the power supply unit in water or other liquids. Never operate the power supply unit in such a way that it can fall into a tub or sink.
- Never reach for the power supply unit if it has fallen into water. In such a case, disconnect the mains plug immediately.
- Never pull the mains adapter out of the socket by the mains cable; always grasp the mains plug.
- Never use the connection cables as carrying handles.
- Never handle the power supply unit with wet or damp hands. There is a risk of electric shock.
- Also observe the safety instructions and operating instructions of the consumer devices that are connected to the power supply unit.
- When using in commercial facilities, observe the accident prevention regulations of the Association of Industrial Trade Associations for electrical installations and equipment.
- Do not alter or modify the power supply unit

Start up:

- Place the power supply unit on a solid surface that is not sensitive to heat.
- Only connect the power supply unit if the mains voltage of the socket corresponds to the specification on the type plate.
- Only connect the power supply unit to an easily accessible socket so that you can quickly disconnect it from the mains in the event of a fault.
- Lay the connection cables so that they do not become a tripping hazard.
- Do not bend the connection cables and do not lay them over sharp edges.
- The product heats up during operation. Do not cover the power supply unit with objects and ensure sufficient ventilation.

Istruzioni

Istruzioni di sicurezza:

- Tenere l'alimentatore, tutte le sue singole parti e il materiale di imballaggio lontano dalla portata dei bambini.
- Utilizzare l'alimentatore solo in ambienti chiusi. Non utilizzarlo mai in ambienti umidi o sotto la pioggia.
- Non utilizzare mai l'alimentatore in aree a rischio di esplosione.
- Tenere l'alimentatore lontano da fiamme libere e superfici calde.
- Non esporre l'alimentatore a temperature estreme, luce solare diretta, forti vibrazioni, pressione meccanica, umidità, vapori infiammabili o solventi.
- Se l'alimentatore passa da un ambiente freddo a uno caldo, può formarsi condensa che può danneggiare l'elettronica. Non collegare l'alimentatore fino a quando non ha raggiunto la temperatura ambiente.
- Non utilizzare l'alimentatore se presenta danni visibili, è stato conservato a lungo in condizioni sfavorevoli o è difettoso.
- Non immergere l'alimentatore in acqua o altri liquidi. Non utilizzare mai l'alimentatore in modo tale che possa cadere in una vasca, in un lavandino o in un contenitore con acqua o altri liquidi.
- Non toccare mai l'alimentatore se è caduto in acqua. In tal caso, scollegare immediatamente la spina di rete.
- Non estrarre mai la spina dalla presa di rete tirandola dal cavo; per scollegare l'alimentatore dalla rete afferrare la spina.
- Non utilizzare mai i cavi di collegamento come maniglie per il trasporto.
- Non maneggiare mai l'alimentatore con le mani bagnate o umide. C'è il rischio di scosse elettriche.
- Osservare anche le istruzioni di sicurezza e di funzionamento dei dispositivi collegati all'alimentatore.
- Quando si utilizza in ambiti diversi da quello privato, rispettare le norme in vigore del relativo settore di utilizzo.
- Non alterare o modificare l'alimentatore

Utilizzo:

- Posizionare l'alimentatore su una superficie solida non sensibile al calore.
- Collegare l'alimentatore solo se la tensione di rete della presa corrisponde alle specifiche indicate sulla targhetta.
- Collegare l'alimentatore solo a una presa facilmente accessibile in modo da poterlo scollegare rapidamente dalla rete elettrica in caso di guasto.
- Posizionare i cavi di collegamento in modo che non costituiscano un pericolo di inciampo.
- Non curvare i cavi di collegamento e non appoggiarli su spigli vivi.
- Il prodotto si riscalda durante il funzionamento. Non coprire l'alimentatore con oggetti e garantire una sufficiente ventilazione.
