

## ■ Features

- · Constant Current mode output
- · Circular metal housing with class I design
- · Built-in active PFC function
- · IP67 / IP65 rating for indoor or outdoor installations
- Function options: output adjustable via potentiometer; 3 in 1 dimming; DALI
- Typical lifetime>50000 hours
- 5 years warranty

# Applications

- · LED bay lighting
- · LED stage lighting
- · LED spot lighting
- Type "HL" for use in Class I, Division 2 hazardous (Classified) location.

## Description

HBG-100 series is a 100W AC/DC LED driver featuring the circular shape design. It operates from 90~305VAC and offers the constant current output models with different rated voltage between 24V and 60V. Thanks to the high efficiency up to 91.5%, with the fanless design, the entire series is able to operate for -40  $^{\circ}$ C  $^{\circ}$  +85  $^{\circ}$ C case temperature under free air convection. The design of metal housing and IP67/IP65 ingress protection level allows this series to fit both indoor and outdoor applications. HBG-100 is equipped with various function options, such as dimming methodologies, so as to provide the optimal design flexibility for LED lighting system.

## Model Encoding

Type	IP Level	Function	Note
Blank	IP67	lo fixed.	In Stock
Α	IP65	Io adjustable through built-in potentiometer.	In Stock

## ■ BLOCK DIAGRAM

fosc: 100KHz

## ■ DRIVING METHODS OF LED MODULE

 $\ensuremath{\mathbb{X}}$  This series works in constant current mode to directly drive the LEDs.

Typical output current normalized by rated current (%)

In the constant current region, the highest voltage at the output of the driver depends on the configuration of the end systems.

Should there be any compatibility issues, please contact MEAN WELL.

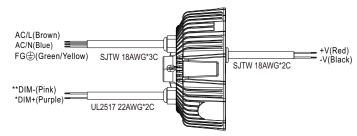

## **■ DIMMING OPERATION**

\* DIM+ for B/AB-Type

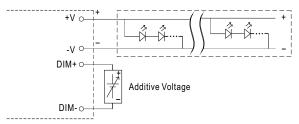

\* \*DIM- for B/AB-Type DA- for DA-Type

DA+ for DA-Type

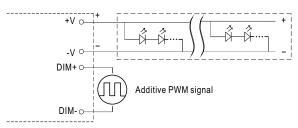

### **※** 3 in 1 dimming function (for B/AB-Type)

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-:
   1 ~ 10VDC, or 10V PWM signal or resistance.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply:  $100\mu A$  (typ.)
- O Applying additive 1 ~ 10VDC

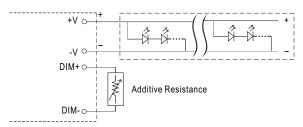

"DO NOT connect "DIM- to -V"

O Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

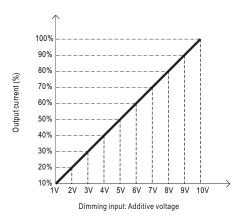

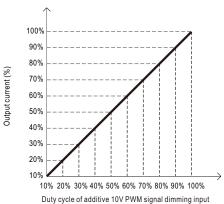

"DO NOT connect "DIM- to -V"

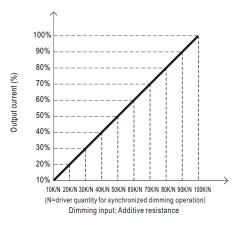

Applying additive resistance:

"DO NOT connect "DIM- to -V"

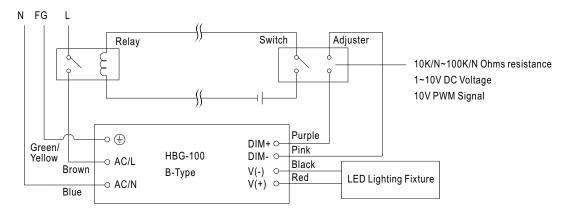

Note: In the case of turning the lighting fixture down to 0% brightness, please refer to the configuration as follow, or please contact MEAN WELL for other options.

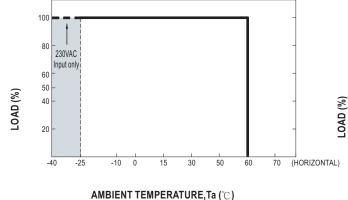

Using a switch and relay can turn ON/OFF the lighting fixture.

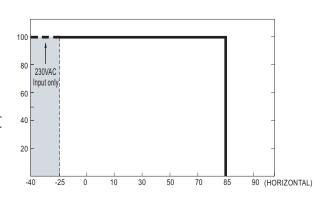

### **X** DALI Interface (primary side; for DA-Type)

- · Apply DALI signal between DA+ and DA-.
- DALI protocol comprises 16 groups and 64 addresses.
- First step is fixed at 8% of output.

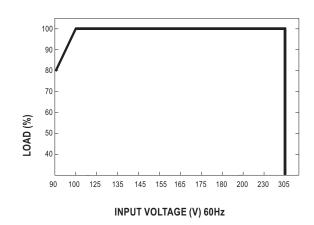

(°C) Tcase (°C)

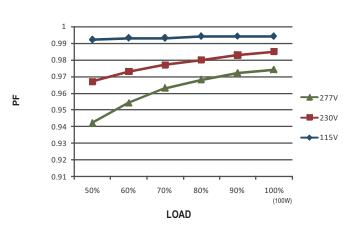

### ■ STATIC CHARACTERISTIC

\* De-rating is needed under low input voltage.

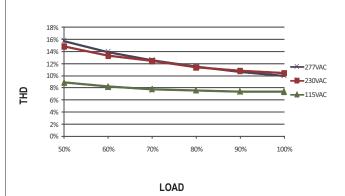

## ■ POWER FACTOR (PF) CHARACTERISTIC

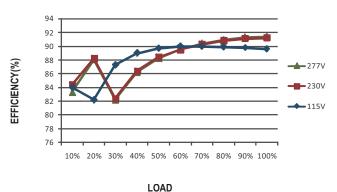

## ■ TOTAL HARMONIC DISTORTION (THD)

## **※** 48V Model, Tcase at 75°C

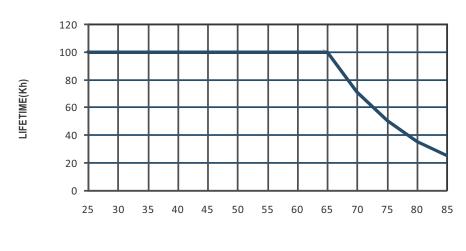

### **■** EFFICIENCY vs LOAD

HBG-100 series possess superior working efficiency that up to 91% can be reached in field applications.

## ■ INSTALLATIONS

#### Caution

- Please inspect the appearance of the driver if the package is damaged. There should not be any cracks.
- · Please do not drop or bump the driver.
- · All screws including the suspension screw should be paired with a spring washer and locked tight.
- $\cdot$  The entire luminaire, including the driver, should be limited to 10Kg or less.
- · The luminaire should be cautiously protected from damage due to shock throughout packaging and transportation.
- · Please thoroughly follow the preceding cautionary notes to prevent the luminaire from falling, leading to injuries.
