

Silicone cover

SKU: 5906660327240

Key features

- Dedicated for temperature sensor
- IP 42
- Colors: transparent white, transparent red and transparent blue (custom colors for orders over 800 units)

Additional information

Loggers can be equipped with dedicated silicone covers which protect the devices against mechanical damages and water splashes. Silicone cover increases the protection level of the enclosure to IP42 level.

Silicone cover is dedicated for sensors which do not need air flow, like temperature, I/O, pulse counters. It won't work with any sensors that measure the air related parameters.
