Cloud licence for Efento Cloud platform

SKU: 5906660327530

Key features

➜ Efento Cloud registration fee (per sensor)
➜ One time payment
➜ Email notifications are free, text messages are extra paid

Additional information

Efento Cloud is a platform that allows you to collect, analyse and visualise sensor data, generate reports out of it and notify users, if the values measured by the sensors are out of the safe range. Efento Cloud works with all Efento sensors, no matter what communication technology they use.

To add sensor to Efento Cloud platform, one time payment cloud license is required.
Use of Efento Cloud is free of subscription fees.
