

Neon Specification

# NMS0306

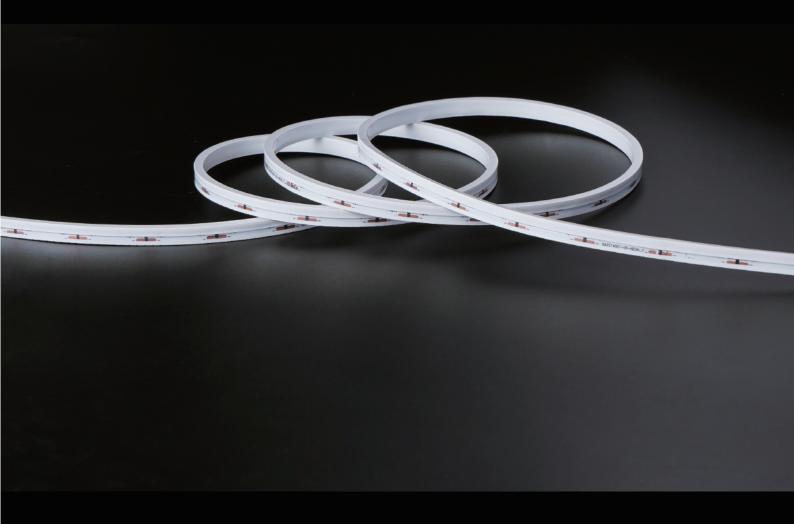

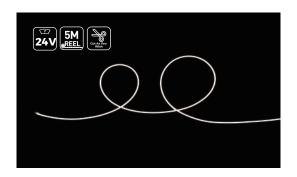

## [Features]

- · Light source: High density, LM80 proved.
- $\cdot$  Process & Material: High light transmittance, environmental silicone material, integrated extrusion molding technology.
- · Optical Design: Unique optical light distribution structure design, uniform lighting surface and no shadow.
- $\cdot$  Appearance Design: Super small model, compact and simple, unique design.
- · Product Certification: CE、ROHS.
- $\cdot$  Environmental Features: Resistance to saline solutions, acids & alkali, corrosive gases and UV.
- · Working/Storage Temperature: Ta:-25~55°C / 0°C~60°C.
- · Application:Interior outline, Furniture supporting lighting.
- ·Indoor 3-year warranty, working life ≥ 36000 hours.

#### Note:

- 1. The above data is the testing result of 1M standard product;
- 2 The lumens of output data can be vary up to  $\pm 10\%$ ;
- 3. The above parameters are all typical values.

## **[Light Distribution]**

## [Packaging Solutions]

#### · Standard Packaging

1. Line marking, the line marking is affixed at a distance of 80mm from the end of the line;

2. Put the product information label on the back back of the static bag inside the marking line;

3.Put the light strip into anelectrostatic bag, one roll per bag, and seal the bag;

4. Label the carton and pack it into the carton

5. Pack 4 boxes of products in the carton

6. Put the product information label and the box number label on the side of the carton, and the QC inspection stamp

### **(Precautions)**

- $\cdot$  Use a 24V DC isolated power supply to drive the neon lamp strip and the ripple wave of constant voltage source shall be less than 5%. It is not allowed to use RC voltage reduction or non-isolated power supply to drive the neon lamp strip.
- $\cdot$  In actual applications, 20% of the power supply shall be kept (only 80% of the power is used) to guarantee that sufficient voltage is available to drive the product.
- · Attention shall be paid to safe operation. After powering on, it is not allowed to touch the AC power supply to avoid an electric shock.
- · Attention shall be paid to the positive and negative poles of the wires during installation and whether the power supply conforms to required voltages to avoid damages.
- · Avoid scratching, distortion and irregular bending of the product during installation; otherwise it may cause irreparable damage to the product.
- $\cdot$  Please do not bend the strip into an arc with a diameter less than 30mm to ensure the longevity and reliability, the bending diameter too small will damage the product itself.
- $\cdot$  If the actual length of application exceeds the specified using length, it will lead to overload heating and uneven brightness.
- · Non-professionals are prohibited from installing, disassembling and repairing the product.
- · Do not use any acid or alkaline adhesive to fix products (including not limited to glass cement, etc.)
- $\cdot$  The final color of products with different sizes and specifications is slightly deviated due to structural differences under the same color temperature, which should be confirmed before use.
- · Please use professional cutting tools when cutting.

No stretching

No distortion

No trampling
